

BOSTON – Cole Hersee Company announced today that it has been acquired by Littelfuse, Inc. of Chicago, Illinois. The combined company will be well-positioned to better serve OEMs and Aftermarket customers in the Heavy Vehicle sector. Cole Hersee will continue to design and manufacture innovative and dependable products, while providing the excellent customer service customers have relied upon since 1924.

Donald Mayer, vice president of Cole Hersee, said, “This is a great fit. We think the combination with Littelfuse will enable us to bring new products and capabilities to our customers, and provide new opportunities to serve them.”

“The acquisition of Cole Hersee is a significant step in our strategy to expand our OTB (Off-Road, Truck & Bus) business,” said Dieter Röder, vice president and general manager, Littelfuse Automotive Business Unit. “We expect the Cole Hersee acquisition to strengthen key customer relationships, expand our distribution network in North America and extend our product offering to adjacent markets and technologies. Their focus on power management products and heavy duty electromechanical and solid-state switches for DC electrical systems expands our offering to this diverse OTB customer base.”

Cole Hersee is well-known for its broad range of reliable electromechanical switches and its increasing range of electronic switching modules. Cole Hersee is a specialist in the Heavy Vehicle industry, fulfilling diversified applications for trucks, off-road, utility, transit, emergency vehicles and boats.

### **About Littelfuse, Inc.**

Littelfuse, Inc. (NASDAQ:LFUS) is the worldwide leader in circuit protection, offering the industry’s broadest and deepest portfolio of circuit protection products and solutions. Backed by industry-leading technical support, design and manufacturing expertise, Littelfuse products are vital components in virtually every product that uses electrical energy, including portable and consumer electronics, automobiles, industrial equipment and telecom/datacom circuits.
